

Andrea Ria, PhD (Member IEEE) received the bachelor's, master's degrees and the PhD in electronics engineering from the University of Pisa, Pisa, Italy, in 2014, 2016 and 2021, respectively. He is currently a Post Doc fellow with the Department of Information Engineering of University of Pisa. In 2022 he was invited to the University of Roma 3 and Politecnico di Milano to hold seminars concerning the integrated electronic mixed-signal circuits. He is a TPC member of RFID-TA Conference and Guest Editor of different scientific Journals. In 2019 he won the "Distinguished service award" during the RFID-TA conference. In 2018, he won the Huawei Italy University Challenge. He is Vice Chair of IEEE Student Branch of University of Pisa.

His research activity is focused on low-voltage and low-power mixed-signal integrated sensor interfaces.
